

# Swimming Pool Valet Service

---

The objective of our pool valet service is to keep your swimming pool water crystal clear, hygienically clean, protect your swimming pool equipment and be ready to use at all times.

Our pool valet service intervals will be agreed on an individual basis to meet your requirements. Our most popular service is fortnightly visits, however, visits can be carried out more or less frequently depending on pool usage and how much maintenance, if any, you carrying out yourself.

See below what a typical valet visit entails:

1. Remove pool cover and check operation. Clean if required.
2. Check all pool fittings for correct operation.
3. Remove and clean skimmer baskets.
4. Brush pool walls and floor.
5. Vacuum pool thoroughly.
6. Backwash and rinse filter.
7. Top up pool water level as required.
8. Test pool water and balance as required.
9. Top up dosing units or manually dose with santiser.
10. Carry out shock treatment as previously agreed schedule.
11. Check operation of pool heating and all other equipment.
12. Deliver to site any chemicals required to maintain your stock levels.
13. Update service records book kept on site.
